Article D: Conditional Uses

Sec. 13-1-60 Statement of Purpose-Conditional Uses

The development and execution of this Article is based upon the division of the Town of Taycheedah into districts, within which districts the use of land and buildings, and location of buildings and structures in relation to the land are mutually compatible and substantially uniform. However, there are certain uses which, because of their unique characteristics, cannot be properly classified as unrestricted permitted uses in any particular district or districts, without consideration, in each case, of the impact of those uses upon neighboring land or public facilities, and of the public need for the particular use of a particular location. Such uses, nevertheless, may be necessary or desirable to be allowed in a particular district provided that due consideration is given to location, development and operation of such uses. Such uses are classified as conditional uses. Conditional use standards for the A-1 Exclusive Agricultural/Farmland Preservation District and A-2 General Agricultural District are detailed in Sections 13-1-52 and 13-1-53.

Sec. 13-1-61 Authority of the Board of Appeals

- a) The Board of Appeals hereby authorizes the Town Clerk to issue a conditional use after review, public hearing, and approval from the Board of Appeals, provided that such conditional use and involved structures are found to be in accordance with the purpose and intent of this Zoning Code and are further found to be not hazardous, harmful, offensive or otherwise adverse to the environment or the value of the neighborhood or the community. Such Board of Appeals action and the resulting conditional use permit, when, for limited conditional use, shall specify the period of time for which effective, if specified, the name of the permittee, the location and legal description of the affected premises. Prior to the granting of a conditional use, the Board of Appeals shall make findings based upon the evidence presented that the standards herein prescribed are being complied with.
- b) Any development within five hundred (500) feet of the existing or proposed rights-of-way of freeways, expressways and within one-half (1/2) mile of their existing or proposed interchange or turning lane rights-of-way shall be specifically reviewed by the highway agency that has jurisdiction over the traffic way. The Board of Appeals shall request such review and await the highway agency's recommendation for a period not to exceed twenty (20) days before taking final action.

- c) Conditions such as landscaping, architectural design, type of construction, construction commencement and completion dates, sureties, lighting, fencing, planting screens, operational control, hours of operation, improved traffic circulation, deed restrictions, highway access restrictions, increased yards or parking requirements may be required by the Board of Appeals upon their finding that these are necessary to fulfill the purpose and intent of this Chapter. Refer to Section 13-1-68.
- d) Compliance with all other provisions of this Chapter, such as lot widths and area, yards, height, parking, loading, traffic, highway access and performance standards shall be required of all conditional uses.

Sec. 13-1-62 Initiation of Conditional Use

Any person, firm, corporation or organization having a freehold interest of a possessory interest entitled to exclusive possession, or a contractual interest which may become a freehold interest, or an exclusive possessory interest, and which is specifically enforceable in the land for which a conditional use is sought may file an application to use such land for one (1) or more of the conditional uses provided for in this Article in the zoning district in which such land is located.

Sec. 13-1-63 Application for Conditional Use

An application for a conditional use shall be filed on a form prescribed by the Town. The application for a conditional use shall be accompanied by a plan showing the location, size and shape of the lot(s) involved and of any proposed structures, the existing and proposed use of each structure and lot, and shall include a statement in writing by the applicant and adequate evidence showing that the proposed conditional use shall conform to the standards set forth in Section 13-1-66 hereinafter. The Board of Appeals may require such other information as may be necessary to determine and provide for an enforcement of this Chapter, including a plan showing contours and soil types; high-water mark and groundwater conditions; bedrock, vegetative cover, specifications for areas of proposed filling, grading, and lagooning; location of buildings, parking areas, traffic access, driveways, walkways, open spaces and landscaping; plan of buildings, sewage disposal facilities, water supply systems and arrangements of operations.

Sec. 13-1-64 Hearing on Application

All requests for conditional uses shall be to the Board of Appeals. Upon receipt of the application and statement referred to in Section 13-1-63 above, the Board of Appeals shall hold a public hearing on each application for a conditional use at such time and place as shall be established by the Board of Appeals. The hearing shall be conducted and a record of the proceedings shall be preserved in such a manner and according to such procedures as the Board of Appeals shall, by rule, prescribe from time to time.

The Town of Taycheedah Town Board must approve the bonding company and the Town of Taycheedah must be named as obligee in the bond.
10. Two (2) towers may be permitted to be located within 100 feet of each other on the same property subject to Conditional Use review and approval by the Town of Taycheedah Board of Appeals and subject to meeting the setback requirements. Written evidence, by an independent expert named by the Town of Taycheedah, must be submitted that indicates the inability to collocate. The cost of such evidence will be the owner/operator's expense.
11. Three (3) towers may be permitted within 100 feet of each other on the same property subject to Conditional Use review and approval by the Town of Taycheedah Board of Appeals, when needed to satisfy the requirements of AM Broadcast operations.
12. A public hearing shall be conducted to receive oral or written testimony from landowners and homeowners whose property is adjacent to proposed tower sites. This testimony shall be received by the Town of Taycheedah Board of Appeals and shall be considered when making siting decisions. For more details on the hearing procedure, see Article D of the Zoning Code.

f) **Prohibitions.**

1. No temporary mobile communication sites are permitted except in the case of equipment failure, equipment testing, and equipment replacement or in the case of emergency situations. Placement of temporary equipment shall be limited to 90 days unless extended in writing by the Zoning Administrator.

2. No advertising message/sign shall be affixed to any tower or antenna.
3. No part of any tower or antenna shall extend across or over any right-of-way, public street, highway, sidewalk or adjacent property.

g) **District Requirements.**

1. **Areas permitting telecommunications facility.** Areas permitting telecommunication facility location with Zoning Permit review and approval.
 - a. Installation of free standing antennas (ground mounted, not supported on or attached to a building) and their supporting towers, poles or masts (excluding exempt facilities listed above) shall require issuance of a building permit when the overall height of the antennas and their supporting structure does not exceed a height of 60 feet above the original grade at the site of the installation. This provision shall apply to all agricultural, commercial, and industrial districts. Free standing antennas and their support to the Conditional Use regulations.
 - b. Antennas attached to an existing tower, structure, or utility pole shall not exceed the total height approved by the Board of Appeals and thereby stated in the Conditional Use Permit.
2. **Areas prohibiting telecommunication facility.** Areas prohibiting telecommunications facility location:
 - a. Floodplains.

- j. Residential Growth Area as defined and mapped in the Town of Taycheedah Comprehensive Plan adopted on May 11, 2009.
- 3. **Areas permitting telecommunications facility location with Conditional Use permit review and approval.** Telecommunications facilities are regulated according to the zoning district in which the property is located. The facility must meet all requirements of the governing district other than the standards in this Section: 1. A-1 Exclusive Agricultural/Farmland Preservation District.
- 4. **Siting location of telecommunication facilities.** Telecommunication facilities shall be located in the A-1 Exclusive Agricultural/Farmland Preservation District.
- 5. **Areas exempt from the siting location.** Telecommunication facilities may be permitted on the following site locations:
 - a. Monopole(s) only on the parcel of land owned by the Town of Taycheedah located in Section 20, further described as part of the NW $\frac{1}{4}$ of the SE $\frac{1}{4}$, as described in V614512, 4.90 acres. The parcel is located north of the salt shed parcels.
 - b. A parcel of land on which exists a communication facility as of the date of adoption and publication of this ordinance.
- 6. **Areas Limiting Telecommunication Facility Location.** Telecommunications facilities may be permitted as described in the previous section, but are also subject to review and approval by the Federation Aviation Administration (FAA), State Bureau of Aeronautics and other appropriate agencies, if located within:
 - a. 1/2 mile radius from heliports;
 - b. 1 mile radius from private airport runways;
 - c. 3-mile radius from public use airport runway(s).
- h) **Performance Standards.** Except as provided in this Section, all wireless communication facilities shall meet the dimensional standards of the A-1 Exclusive Agricultural/Farmland Preservation District.
- 1. **Setback and Separation.**
 - a. Tower structures shall be set back from the nearest property line a distance equal to the height of the tower or as delineated by the following minimum setback requirement, whichever is greater:
 - 1. Minimum setbacks for the telecommunication structures. The following setback provisions shall be measured from the base of the tower or telecommunications

support facilities, unless otherwise stated. If more than one setback standard applies the greater setback distance prevails.

- i. **Highway Setback Lines.** See Sec. 13-1-24 of the Town of Taycheedah Code of Ordinances.
- ii. **Lot Line Setbacks.** Fifty (50) feet for towers, twenty-five (25) feet for guy wire anchors in the case of guyed towers.
- iii. **Setbacks from Habitable Commercial and Residential Buildings.** One hundred twenty-five (125%) percent of the height of the tower.

- b. Tower structures shall be set back from the nearest road right-of-way a distance equal to the height of the tower, or the right-of-way setbacks established in the Town of Taycheedah Zoning Code, whichever is greater.
- c. All guy wire anchors shall be set back at least twenty-five (25) feet from all property lines; this does not include leased parcels with boundaries located within a larger property. Subsurface anchors or portions of anchors that are subsurface shall be located on the property in which the tower has been constructed.
- d. Towers shall not be located within five hundred (500) feet of any residence other than the residence on the parcel on which the tower is to be located.
- e. When located on contiguous lands also containing the residence of the owner of the property, the setback from any residence on adjacent property shall be no less than that from the residence of the owner of the property on which the tower is to be located. For the purpose of this Section, contiguous lands shall include adjacent parcels separated by a public highway, whether dedicated or by easement.
- f. Towers shall not be located within one thousand (1,000) feet of any single-family dwelling within a platted subdivision.
- g. The required separation distance between tower and dwelling and/or subdivision may be reduced by obtaining the written agreement of the adjacent property owner and the Town of Taycheedah Board of Appeals. The separation distance shall not be less than 125% of the height of the tower.

2. **Collocation/Sharing of Facilities.**

- a. No new tower shall be permitted unless the applicant demonstrates to the satisfaction of the Board of Appeals that no existing tower or structure can accommodate the applicant's proposed antenna. Any applicant requesting permission to install a new tower shall provide evidence of written contact with all wireless service providers who supply service within the Town of Taycheedah. The

applicant shall inquire about potential collocation opportunities at all technically feasible locations. The contacted providers shall be requested to respond in writing to the inquiry within 30 days. The applicant's letter(s) as well as response(s) shall be presented to the Town of Taycheedah Board of Appeals as a means of demonstrating the need for a new tower. Supporting evidence of the need for a new tower shall consist of any of the following conditions:

1. No existing towers or structures are located within the geographic area required to meet the applicant's engineering requirements.
 2. Existing towers or structures are not of sufficient height to meet the applicant's engineering requirements.
 3. Existing towers or structures do not have sufficient strength to support the applicant's proposed antenna and related equipment.
 4. The applicant's proposed system would cause electromagnetic interference with the system on the existing tower or structure, or the system on the existing tower or structure would cause interference with the applicant's proposed system.
 5. The fees, cost or contractual provisions required by the owner to share an existing tower or structure or to adapt an existing tower or structure for sharing are unreasonable. Costs are considered unreasonable if they exceed the cost of the development and the construction of a new structure.
 6. The applicant demonstrates that there are other limiting factors that render existing towers or structures unsuitable.
- b. New towers shall be designed structurally and electrically to accommodate the applicant's users (minimum of 3 users required for each tower structure). Towers must also be designed to allow for future rearrangement of antennas on the tower and accept antennas mounted at different heights. The requirement for construction to allow a minimum of two additional users may be waived by the Town of Taycheedah Board of Appeals if evidence is provided that a special circumstance exists that would prevent the proposed tower structure from feasibly supporting additional users.
3. **Screening and Landscaping.** All telecommunication facilities, except exempt facilities as earlier defined, shall be designed to blend into the surrounding environment to the greatest extent feasible.
- a. The tower location shall provide for the maximum amount of screening of the facility. The site shall be landscaped and maintained with a buffer of plant materials that effectively screens the view of all tower accessory structures, equipment and

improvements at ground level from adjacent properties. The standard buffer shall consist of a landscaped strip at least twenty (20) feet outside the perimeter of the area where tower accessory structures and equipment are located at ground level.

- b. In locations where the visual impact of the tower would be minimal, the landscaping requirements may be reduced or waived by the Town of Taycheedah Board of Appeals. Existing mature vegetation and natural landforms on the site shall be preserved to the maximum extent possible or replaced with vegetative screening meeting the intent of this section.
- c. Upon project completion, the owner(s)/operator(s) of the facility shall be responsible for maintenance and replacement of all required landscaping during the current growing season.
- d. Satellite dish and parabolic antennas shall be situated as close to the ground as possible to reduce visual impact without compromising their function.

4. Security Fencing, Lighting and Signs.

- a. Towers, tower guy anchor points, and equipment structures and enclosures shall be enclosed by security fencing not less than six (6) feet in height and secured so as to make the enclosure area inaccessible to the general public. All towers shall be reasonably protected against unauthorized access. The bottom of the tower from ground level to 12 feet above ground shall be designed to preclude unauthorized climbing.
- b. Security lighting for on-ground facilities and equipment is permitted, as long as it is down shielded to keep light within the boundaries of the site.
- c. Signs shall be mounted on the fenced enclosure, on or adjacent to the gate prohibiting entry without authorization, warning of the danger from electrical equipment and/or unauthorized climbing of the tower, and identifying the owner of the tower and telephone number for contact in case of emergency.

5. Color and Materials.

- a. Telecommunication towers shall be constructed out of metal or other non-flammable material, unless specifically permitted by the Town of Taycheedah Board of Appeals to be otherwise.
- b. Telecommunication support facilities shall be constructed out of non-reflective materials (visible surfaces only) and shall be designed to blend with existing architecture in the area. Support facilities shall be no taller than one story (15-feet) in height, measured from the original grade at the base of the facility to the top of the structure, and shall be located or designed to minimize their visibility.

- c. Telecommunication facility towers shall be painted a non-contrasting color in relation to its environment to minimize its visibility, unless otherwise required by the FCC or FAA. Galvanized towers may be permitted.
- d. Camouflaged towers and related facilities are encouraged and may be required in historical, environmental or other sensitive areas as determined by the Town of Taycheedah Board of Appeals.

6. **Parking and Access**

- a. There shall be adequate off-street parking provided for each site. The Town of Taycheedah Board of Appeals may require additional parking if the minimum parking proves to be inadequate. Minimum parking is considered to be one stall for each prospective user of the site. Access must be provided by an all-weather gravel or paved driveway.
- b. All sites must be served by a minimum twenty (20) foot wide ingress/egress with a turnaround. All sites shall use existing access points and roads whenever possible. The Fond du Lac County Highway Dept., State of WI DOT, or the applicable municipality depending on road jurisdiction shall approve the access point to the site.

i) **Permit Requirements.**

- 1. The construction or installation of any wireless telecommunication facility requires the issuance of a zoning permit or conditional use permit under this Section.
 - a. **Land Use Permit.** A Land Use Permit shall be obtained from the Permit Issuer or designated representative of the Town of Taycheedah. Applications for a Land Use Permit to add a new antenna to an existing tower or structure shall be subject to the requirements 13-1-76(i)(2)(b), (d) and (e), and such other information as the Permit Issuer deems appropriate.
 - b. **Conditional Use Permit.** Uses and facilities requiring a conditional use permit under this Section shall be authorized by the Board of Appeals upon the submittal of a properly completed application for a conditional use permit as detailed in this subsection and Board of Appeals approval after conducting a public hearing.
 - c. **Failure to Obtain the Proper Permits.** Failure to obtain the proper permits shall be considered a violation of this Section and may subject the violator to any appropriate penalties. A zoning permit for a telecommunication facility shall expire six (6) months after issuance if the tower and/or supporting facilities have not been erected. The Permit Issuer or his/her designees due to unforeseen or extenuating circumstances may grant one extension of time, not to exceed six (6) months per request. There is no additional fee for an extension.

2. **Applications.** Applications for conditional use permits for new wireless telecommunication facilities shall include the following information:
 - a. **Conditional Use Application.** Completed conditional use application form and the \$500.00 fee. The form must have the original signature of the applicant and land owner (if the telecommunication facility is located in an easement, the beneficiaries of the easement and underlying property owner must authorize the application); the identity of the carrier/provider, applicant, landowner and service provider and their legal status; and the name, address and telephone number of the officer, agent and/or employee responsible for the accuracy of the application.
 - b. **Site Plan.** A site plan or plat of survey (drawn to a commonly used engineering scale, i.e. 1"=20' or 1"=50', etc.) showing a written legal description of the parcel boundaries (including lease boundaries and acreage), tower and support facilities (including dimensions and the lighting and painting to be used on tower and buildings), access, landscaping, fencing, zoning district, adjacent zoning districts if different than site, existing and proposed contours, location map, north arrow and plan scale.
 - c. **Land-Lease Agreement.** In the case of a land-leased site a copy of a lease agreement or binding lease memorandum, or a letter signed by all parties, shall be submitted which shows on its face that it does not preclude the tower owner from entering into sub-leases on the site with the carrier/provider(s), and the legal description and amount of property leased.
 - d. **Submittal.** Submittal of information including:
 1. A description of the proposed tower's height and capacity, including the potential number and type of antennas and carriers/providers that it can accommodate.
 2. Location of all sites that were considered as possible alternatives to the site being applied for, and the reasons for recommending the current site.
 3. A photo simulation of the proposed facility from affected residential properties and public right-of-way.
 - e. **Facility Plan.** Each application shall include a facility plan. The Town will maintain an inventory of all existing and proposed wireless communication site installations and all tower owners and/or carriers/providers shall provide the following information in each plan. The plan will contain information on the applicant's sites only, and must be updated with each submittal as necessary.

1. Written description of the type of consumer services each carrier/provider will provide to its customers (cellular, PCS, SMR, ESMR, Paging or other anticipated wireless communication services).
 2. Provide a list of all existing sites to be upgraded or replaced and proposed telecommunication sites within the Town of Taycheedah and all adjacent townships for these services to be provided by the provider.
 3. Provide access to a map, which shows the geographic service areas of the existing and proposed telecommunication sites in the Town and all the sites in adjacent towns.
- f. **Landowner acknowledgement.** Written acknowledgement by the landowner of a leased site that he/she will abide by all applicable terms and conditions of the land use permit and a conditional use permit, including the restoration and reclamation requirements of this Section. Such acknowledgement shall be made applicable to all successors, heirs and assignees.
- g. **Additional information and analysis.** The Board of Appeals may, at their discretion, require additional information deemed necessary to facilitate review of the request. The Board of Appeals may employ, on behalf of the Town, an independent technical expert to review technical materials submitted by the applicant or to prepare any technical materials required by not submitted by the applicant. The applicant shall pay the costs of such review and/or independent analysis. The payment to the Town shall be due upon receipt of an invoice. All invoices, fees, and charges accumulated for the technical review must be paid in full prior to the issuance of permit(s).
3. **Submittals required following the Conditional Use Approval.** For each Conditional Use permit approved by the Town of Taycheedah Board of Appeals the applicant shall submit the following before the permit will be issued:
- a. A report stamped and signed by a professional engineer registered in the State of Wisconsin which:
 1. Certifies that a detailed engineering soils report has been completed and that the design of the tower foundation is based on that report.
 2. Describes the tower height and design, including a cross section elevation and foundation design.
 3. Certifies the facility's compliance with structural and electrical standards.
 4. Certifies that the applicant (or tower owner/carrier/provider the applicant represents) has a valid license from the FCC (where applicable) to operate the

- proposed facilities, and identifies both the class of the license and the license holder.

 - e. Copies of any filings submitted to the FCC shall be submitted within 30 days of filing, subject to the review of the Town Board or his/her designee, if applicable.
4. **Annual Information Report.** The purpose of the annual review report is to provide the Town with accurate and current information concerning the telecommunication tower owners and carrier/providers who offer or provide telecommunication services within the Town, or that own or operate telecommunication facilities within the Town, to assist the Town in enforcement of this Section, and to assist the Town in monitoring compliance with Local, State and Federal laws. All telecommunication tower owners and carrier/providers of any new or existing telecommunication facility shall submit annually on or before January 31st of each year, to the Town Board a Telecommunication Facility Annual Information Report. The Annual Report shall include the owner and operator names, addresses, phone numbers, contact person(s), and any other appropriate information deemed necessary by the Town Board. Tower owners and operators shall supply the number of collocation positions designated, occupied, or vacant. The information shall be submitted on a Town form, designated for such use, and shall become evidence of compliance.
- j) **Non-Compliance/Revocation.** Grounds for revocation of the Conditional Use Permit shall be limited to one of the following findings as determined by the Town of Taycheedah Board of Appeals:
 1. The owner of such site, service provider, and/or tower owner fails to comply with any requirements of this Section as it existed at the time of the issuance of the conditional use permit; or,
 2. The permittee has failed to comply with any of the conditions of approval imposed; or,
 3. The facility has not been properly maintained.

4. If one of these findings exists, the Taycheedah Town Board shall report to the Board of Appeals of the non-compliance. The owner of the site, service provided, and/or tower shall be notified of the non-compliance and given an opportunity to present their position to the Board of Appeals. If the Board determines that the facility is non-compliant, a corrective notice shall be given with a time period specified. If compliance is not obtained in the time identified, the Conditional Use Permit will automatically be rescinded.
- k) **Transferability.** All permits issued under this Section shall be transferrable, and all subsequent holders of such permits shall be subject to all applicable requirements of this Section and any permit conditions that may exist. Written notice, by registered mail, shall be made to the Taycheedah Town Board and Town Clerk within 30 days of such transfer.
- l) **Severability.** In the event, any portion of this Section is adjudged unconstitutional or invalid by a court of competent jurisdiction, the remainder of this Section shall not be affected.
- m) **Enforcement and Penalties.** The provisions of this Section shall be enforced under the direction of the Town of Taycheedah Board of Appeals, through the Town Board, the Permit Issuer and the Fond du Lac County law enforcement officers. For forfeitures and penalties related to non-compliance with this Section of the Zoning Code, please see Article L.

Article E: Nonconforming Uses, Structures and Lots

Sec. 13-1-80 Existing Nonconforming Uses

- a) **Continuation.** Except as otherwise specially provided in this Chapter, the lawful nonconforming use of a structure, land or water existing at the time of the adoption or amendment of this Chapter may be continued although the use does not conform with the provisions of this Chapter, provided however:
1. Only that portion of the land or water in actual use may be so continued and the structure may not be extended, enlarged. Reconstructed, substituted, moved or structurally altered, except when required to do so by law or order or so as to comply with the provisions of this Chapter.
 2. The total lifetime structural repairs or alterations shall not exceed fifty percent (50%) of the assessed value of the structure unless it is permanently changed to conform to the use provisions of this Chapter.
 3. Substitution of new equipment may be permitted by the Town Board if such equipment will reduce the incompatibility of the nonconforming use with the neighboring use.
- b) **Abolishment or Replacement of Existing Nonconforming Use.** If such nonconforming use is discontinued or terminated for a period of twelve (12) months, any future use of the structure, land or water shall conform to the provisions of this Chapter. When a nonconforming use or structure is damaged by fire, explosion, flood, the public enemy or other calamity to the extent of more than fifty percent (50%) of its current fair-market value as determined by the Town Assessor, it shall not be restored except so as to comply with the use provisions of this Chapter.

Sec. 13-1-81 Existing Nonconforming Structures

- a) The existing lawful use of a building or premises at the time of the enactment or amendment of this Section may be continued although such use does not conform to the regulations for the district in which it is located. Nonconforming mobile homes shall not be moved, relocated or placed unless in conformity with this Section.
- b) If no structural alternations are made, a nonconforming use of a building may be changed to another nonconforming use of the same or a more restricted classification. Whenever a

nonconforming use has been changed to a more restricted nonconforming use or a conforming use, such use shall not thereafter be changed to a less restricted use.

- c) A nonconforming structure may be repaired, maintained, renovated, or remodeled regardless of the cost of such repair, maintenance, renovation or remodeling.

Sec. 13-1-82 Changes and Substitutions

Once a nonconforming use or structure has been changed to conform, it shall not revert back to a nonconforming use or structure. Once the Town Board has permitted the substitution of a more restrictive nonconforming use for an existing nonconforming use, the substituted use shall lose its status as a legal nonconforming use and become subject to all the conditions required by the Town Board.

Sec. 13-1-83 through Sec. 13-1-89 Reserved for Future Use

Article F: Traffic Visibility, Loading, Parking and Access

Sec. 13-1-90 Traffic Visibility

- a) On a corner lot in all zoning districts, no fence, wall, hedge, planting or structure shall be erected, placed, planted or allowed to grow in such a manner as to obstruct vision between a height of two and one-half (2-1/2) feet and ten (10) feet above the centerline grades of the intersecting streets in the area bounded by the lot lines of such corner lots and a line joining the points along said street lines twenty-five (25) feet from the point of intersection.
- b) In the case of arterial streets intersecting with other arterial streets or railways, the corner cutoff distances establishing the triangular vision clearance space shall be increased to fifty (50) feet.

Sec. 13-1-91 Loading Requirements

- a) **Loading Space Requirements.** On every lot on which a new business, trade or industrial use is hereafter established, space with access to a public street or alley shall be provided as indicated below for the loading and unloading of vehicles off the public right-of-way:

Use Space	Floor Area (sq. ft.)	Loading
Retail, wholesale	2,000-10,000	1
Warehouse, service	10,000-20,000	1

	4,000-6,000	1
	Each additional 10,000	1

- b) **Multiple or Mixed Uses.** Where a building is devoted to more than one (1) use or for different uses and where the floor area for each use is below the minimum required for a loading space but the aggregate floor area of such uses is above such a minimum, then off-street loading space shall be provided as if the entire building were devoted to that use in the building for which the most loading spaces are required.
- c) **Location.** Required off-street loading spaces shall be located on the same lot with the principle use requiring such space. No loading space shall be located within thirty (30) feet of the nearest point of intersection of two (2) streets or require any vehicle to back into a public street.
- d) **Design Standards.** Each off-street loading space shall have a width of at least twelve (12) feet, a length of at least forty (40) feet, and a vertical clearance of at least fifteen (15) feet. Dimensions for loading spaces in connection with funeral homes shall be reduced to ten (10) feet in width, twenty-five (25) feet in length, and eight (8) feet in vertical clearance. All loading berths shall be completely screened from residential properties by building walls or a uniformly painted solid fence, wall or door, or any combination thereof, not less than eight (8) feet in height.
- e) **Surfacing.** All open off-street loading berths shall be improved with a compacted gravel base, not less than seven (7) inches thick, surfaced with not less than two (2) inches of asphalt or treated with some comparable all-weather dustless material.
- f) **Repair and Service.** No motor vehicle repair work or service of any kind shall be permitted in conjunction with loading facilities provided by any Residential District.
- g) **Utilization.** Space allocated to any off-street loading berth shall not, while so allocated, be used to satisfy the space requirements for any off-street parking facilities or portions thereof.
- h) **Central Loading.** Central loading facilities may be substituted for loading berths on individual zoning lots provided the following conditions are fulfilled:
 - 1. Each zoning lot served shall have direct access to the Central Loading Area without crossing streets or alleys at grade.
 - 2. Total berths provided shall meet the requirements based on the sum of the several types of uses served. (Areas of types of uses may be totaled before computing number of loading berths.)
 - 3. No zoning lot served shall be more than three hundred (300) feet removed from the Central Loading Area.

4. The tunnel or ramp connecting the Central Loading Area with the zoning lot served shall be not less than seven (7) feet in width and have a clearance of not less than seven (7) feet.

Sec. 13-1-92 Parking Requirements

All new parking lots and all alterations of existing lots shall be subject to the approval of the Town Board. Requests for said parking lots shall be accompanied with detailed plans on landscaping, parking layout, drainage provisions and driveway locations. In all districts, except those areas which are located in a fire district as designated on the official map, there shall be provided at the time any use or building is erected, enlarged, extended, or increased off-street parking stalls for all vehicles in accordance with the following:

- a) **Access.** Adequate access to a public street shall be provided for each parking space.
- b) **Design Standards.** Each required off-street parking space shall have a stall width of at least nine (9) feet and a stall length of at least eighteen (18) feet. Such space shall have a vertical clearance of at least six and one-half (6-1/2) feet. Minimum width of aisles providing access to stalls for one-way traffic shall be as follows: Aisles shall be not less than twenty-four (24) feet wide for ninety (90) degree parking, eighteen (18) feet wide for sixty (60) degree parking, fifteen (15) feet wide for forty-five (45) degree parking (angle shall be measured between centerline of parking space and centerline of aisle) and twelve (12) feet wide for parallel parking. For parallel parking, the minimum length of the parking space shall be increased to twenty-three (23) feet. No parking area of more than two (2) spaces shall be designed as to require any vehicle to back into a public street. Any parking area of more than five (5) spaces shall be sufficiently screened in the form of a solid fence or shrubbery to protect adjacent residential uses. Large expanses of unchanneled parking areas shall be avoided by interior landscaping and safety islands.
- c) **Location.**
 1. Location to be on the same lot as the principal use or not over four hundred (400) feet from the principal use.
 2. Off-street parking is permitted in all yards of all districts but shall not be closer than five (5) feet to a side lot line, right-of-way line or rear lot line.
- d) **Surfacing.** All open off-street parking areas, except a single parking space accessory to a single-family dwelling, shall be surfaced with a dustless all-weather material capable of carrying a wheel load of four thousand (4,000) pounds [normally, a two (2) inch blacktop on a four (4) inch base or five (5) inches of Portland cement will meet this requirement.] Any parking area for more than five (5) vehicles shall have the aisles and spaces clearly marked.

e) **Landscaping Requirements.**

1. **Landscaping.** All public and private off-street parking areas which serve five (5) vehicles or more and are created or redesigned and rebuilt subsequent to the adoption of this Code shall be provided with accessory landscape areas totaling not less than ten percent (10%) of the surfaced area. The minimum size of each landscape area shall not be less than one hundred (100) square feet.
2. **Location.** Location of landscape areas, plant materials, protection afforded the planting, including curbing and provision for maintenance by the property owner, shall be subject to approval by the Zoning Administration/Permit Issuer.
3. **Plans.** All plans for such proposed parking areas, at the discretion of the Zoning Administrator/Permit Issuer and Building Inspector, shall include a topographic survey or grading plan which shows existing and proposed grades and location of improvements. The preservation of existing trees, shrubs, and other natural vegetation in the parking area may be included in the calculation of the required minimum landscape area.
4. **Special Residential Requirements.** Those parking areas for five (5) or more vehicles if adjoining a residential use shall be screened from such use by a solid wall, fence, evergreen planting of equivalent visual density, or other effective means, built and maintained at a minimum height of five (5) feet. Where a solidly constructed decorative fence is provided along the interior lot line, the minimum setback for the parking area shall be five (5) feet from said lot line. Said fence shall be located a minimum of one (1) foot from the said lot line.
5. **Street Setback Area.** No parking shall be permitted between the street right-of-way line and the building setback line prevailing in the zone in which the proposed parking are is to be located. Article I: Signal Receiving Antennas; Antenna Towers

Sec. 13-1-130 Signal Receiving Antennas

- a) **Purpose.** This Section regulating the placement of signal receiving antennas is adopted to:
1. Provide uniform regulation of all signal receiving antenna devices;
 2. Secure placement of such antennas in an aesthetically sensitive manner while allowing users reasonable reception of signals;
 3. Protect the public from injury from antennas that are inadequately mounted, unduly susceptible to wind pressure, improperly installed and wired, or are placed on structures insufficiently designed or constructed to safely support the antenna; and
 4. Provide for placement of such antennas in locations that preserve access to rear property areas by firefighting apparatus and emergency personnel.
- b) **Permit Required.** No owner shall, within the Town of Taycheedah, build, construct, use or place any type of signal receiving antenna until a permit shall have first been obtained from the Zoning Administrator/Permit Issuer. Excepted from the permit requirements of this Article are small dish [under twenty-four (24) inches in diameter] digital signal receiving antennas, free-standing UHF and VHP antenna towers under 45 feet in height.
- c) **Definitions.**
1. For purposes of this Section, a "signal receiving antenna" is defined as any apparatus capable of receiving communications from a transmitter or a transmitter relay located in a planetary orbit. This definition includes all types of signal receiving antennas, including, without limitation, parabolic antennas, home earth stations, satellite television disks, UHF and VHP television antennas, and AM, FM, ham and shortwave radio antennas, regardless of the method of mounting.
 2. "Owner" means the holder of record of an estate in possession in fee simple, or for life, in land or real property, or a vendee of record under a land contract for the sale of an estate in possession in fee simple or for life but does not include the vendor under a land contract. A tenant in common or joint tenant shall be considered such owner to the extent of his interest. The personal representative of at least one (1) owner shall be considered an owner.

d) **Application.**

1. Application for a signal receiving antenna permit shall be made in writing to the Zoning Administrator/Permit Issuer or Town Clerk. With such application, there shall be submitted a fee as determined by the Town Board and a sufficient set of mounting plans and specifications, including a general plot plan showing the location of the proposed signal receiving antenna with respect to streets, lot lines and buildings.
 - a. Prior to the issuance of a permit for the installation of a satellite television antenna, all owners of property adjoining that of the applicant shall be notified of the application together with copies of any plans or other material filled with the application deemed appropriate. Each property owner shall have ten (10) days to object to the installation of said antenna.
 - b. If any adjoining property owner objects to the installation of said antenna, no permit shall be issued, and the application, plans and any objection thereto shall be referred to the Board of Appeals under Article N of this Chapter.

e) **Installation Standards.** Signal receiving antennas installed in any zoning district within the Town shall comply with the following provisions:

1. **Setbacks.**

- a. Any signal receiving antenna and its mounting post shall be located a minimum of fifteen (15) feet from any property line.
- b. Subject to the provisions herein, signal receiving antennas shall only be located in the rear yard of any lot. If reasonable reception of signals is not possible with a rear yard placement due to the physical characteristics of the lot and area, the signal receiving antenna shall be placed in the side yard of the lot. In the event that reasonable reception of signals is not possible by locating the signal receiving antenna on the rear or side yard of the property, such antenna may be placed in the front yard or on the roof of structures on the property. For corner lots, a side yard is only a yard that does not face a street.
- c. If side yard, front yard or roof mounting is requested, the Zoning Administrator/Permit Issuer shall determine where reasonable reception is possible, based on evidence provided by the person seeking to erect or construct the antenna.

3. **Mounting.** Signal receiving antennas attached to the wall or roof of any principal or accessory structure shall be permitted only if the structure is properly constructed to carry all imposed loading and complies with applicable state and local building code

requirements. The Zoning Administrator/Permit Issuer may require engineering calculations.

4. **Diameter.** The diameter of signal receiving antenna shall not exceed fourteen (14) feet and six (6) feet for a roof-mounted antenna, except for systems used to provide community antenna television services.
5. **Height.**
 - a. A ground-mounted signal receiving antenna, including any platform or structure upon which said antenna is mounted or affixed, may not exceed forty-five (45) feet in height, as measured from the ground to the highest point of the antenna.
 - b. A roof-mounted antenna may not exceed eight (8) feet in height above the ridgeline of the roof as measured from the lowest point of the existing roof line.
6. **Wind Pressure.** All signal receiving antennas shall be permanently mounted in accordance with the manufacturer's specifications for installation. All such installations shall meet a minimum wind load design velocity of eighty (80) mph.
7. **Electrical Installations.** Electrical installations in connection with signal receiving antennas, including grounding of the system, shall be in accordance with the National Electrical Safety Code, Wisconsin State Electrical Code and the instructions of the manufacturer. In cases of conflict, the stricter requirements shall govern. All cable used to conduct current or signals from the signal receiving antenna to the receivers shall be installed underground unless installation site conditions preclude underground. If a signal receiving antenna is to be used by two (2) or more residential property owners, all interconnecting electrical connections, cables and conduits must also be buried. The location of all such underground lines, cables and conduits shall be shown on the application for a permit. All signal receiving antennas shall be grounded against direct lightning strikes.
8. **Temporary Placement.** No portable or trailer-mounted signal receiving antenna shall be allowed, except for temporary installation for on-site testing and demonstration purposes for periods not exceeding five (5) days. However, such trial placement shall be in accordance with all provisions of this Section. Failure to comply shall result in a citation being issued for violation of this Section. Any person making such temporary placement shall first give written notice to the Zoning Administrator/Permit Issuer of the date when such placement shall begin and end.
9. **Advertising.** No form of advertising or identification, sign or mural is allowed on the signal receiving antenna other than the customary manufacturer's identification plates.

10. **Interference with Broadcasting.** Signal receiving antennas shall be filtered and/or shielded so as to prevent the emission or reflection of an electromagnetic radiation that would cause any harmful interference with the radio and/or television broadcasting or reception on adjacent properties. In the event that harmful interference is caused subsequent to its installation, the owner of the signal receiving antenna shall promptly take steps to eliminate the harmful interference in accordance with Federal Communications Commission regulations.
 11. **Compliance with Federal Regulations.** The installation and use of every signal receiving antenna shall be in conformity with the Federal Cable Communications Policy Act of 1984 and regulations adopted thereunder.
 12. **Aesthetic Considerations.** Signal receiving antennas shall be located and designed to reasonably reduce visual impact from surrounding properties at street level.
 13. **Color.** The color of any satellite dish shall be such that it blends into its surroundings and shall be approved by the Zoning Administrator/Permit Issuer as part of the application.
 14. **Signal Receiving Antennas.** Signal receiving antennas installed in the A-I zoning district shall comply with the following provisions:
 - a. All commercial television and radio towers are prohibited in the A-1 Exclusive Agricultural/Farmland Preservation District, and
 - b. All commercial telecommunications uses meeting the definition of a utility must obtain conditional use or special exception permits, regardless of height.
- f) **Variances.** Requests for variances from the standards established by this Section may be made to the Board of Appeals.
- g) **Enforcement.**
1. It shall be unlawful to construct, use, build or locate any signal receiving antenna in violation of any provisions of this Section. In the event of any violation, the Zoning Administrator/Permit Issuer, Town Board or any property owner who would be specifically damaged by such violation may institute appropriate action or proceedings to enjoin a violation of this Section.
 2. Any person, firm or corporation who fails to comply with the provisions of this Section shall, upon conviction, be subject to the general penalty found in Section 1-1-6.

Sec. 13-1-193 Variances

- a) **Purpose.**
 - 1. A request for a variance may be made when an aggrieved party can submit proof that strict adherence to the provisions of this Zoning Code would cause him/her undue hardship or create conditions causing greater harmful effects than the initial condition. A variance granted to a nonconforming use brings that use into conformance with the district and zoning requirements.
 - 2. The Board of Appeals may authorize upon appeal, in specific cases, such variance from the terms of the Zoning Code as will not be contrary to the public interest, where owing to special conditions a literal enforcement of the provisions of the Zoning Code will result in unnecessary hardship and so that the spirit of the Zoning Code shall be observed and substantial justice done. No variance shall have the effect of allowing in any district uses prohibited in that district, permit a lower degree of flood protection than the flood protection elevation for the particular area or permit standards lower than those required by state law.
 - 3. For the purposes of this Section, "unnecessary hardship" shall be defined as an unusual or extreme decrease in the adaptability of the property to the uses permitted by the zoning district which is caused by facts, such as rough terrain or good soil conditions, uniquely applicable to the particular piece of property as distinguished from those applicable to most or all property in the same zoning district.
- b) **Application for Variance.** The application for variance shall be filed with the Zoning Administrator. Applications may be made by the owner or lessee of the structure, land or water to be affected. The application shall contain the following information:
 - 1. Name and address of applicant and all abutting and opposite property owners of record.
 - 2. Statement that the applicant is the owner or the authorized agent of the owner of the property.
 - 3. Address and description of the property.

4. A site plan showing an accurate depiction of the property.
 5. Additional information required by the Town Engineer, Town Board, Zoning Board of Appeals or Zoning Administrator/Permit Issuer.
 6. Fee receipt in the amount as determined by the Town Board.
- b) **Public Hearing of Application.** The Board of Appeals shall conduct at least one (1) public hearing on the proposed variance. Notice of such hearing shall be given not more than thirty (30) days and not less than ten (10) days before the hearing in one (1) or more of the newspapers in general circulation in the Town, and shall give due notice to the parties in interest, the Zoning Administrator/Permit Issuer and the Town Board. At the hearing the appellant or applicant may appear in person, by agent or by attorney. The Board of Appeals shall thereafter reach its decision within thirty (30) days after the final hearing and shall transmit a written copy of its decision to the appellant or applicant.
- c) **Action of the Board.** For the Board of Appeals to grant a variance, it must find that:
1. Denial of variation may result in hardship to the property owner due to physiographical consideration. There must be exceptional, extraordinary or unusual circumstances or conditions applying to the lot or parcel, structure, use or intended use that do not apply generally to other properties or uses in the same district and the granting of the variance would not be of so general or recurrent nature as to suggest that the Zoning Code should be changed.
 2. The conditions upon which a petition for a variation is based are unique to the property for which variance is being sought and that such variance is necessary for the preservation and enjoyment of substantial property rights possessed by other properties in the same district and same vicinity.
 3. The purpose of the variance is not based exclusively upon a desire to increase the value or income potential of the property.
 4. The granting of the variance will not be detrimental to the public welfare or injurious to the other property or improvements in the neighborhood in which the property is located.
 5. The proposed variance will not undermine the spirit and general and specific purposes of the Zoning Code.
- d) **Conditions.** The Board of Appeals on appeal may impose such conditions and restrictions upon the premises benefited by a variance as may be necessary to comply with the standards established in this Section.

Sec. 13-1-194 Review by Court of Record

Any person or persons aggrieved by any decision of the Board of Appeals may present to a court of record a petition, duly verified, setting forth that such decision is illegal and specifying the grounds of the illegality. Such petition shall be presented to the court within thirty (30) days after the filing of the decision in the offices of the Board of Appeals.
